

# Customer Churn Analysis And Summery

---

## Objective:

The analysis explores customer churn patterns, focusing on factors such as payment methods, contract types, tenure, monthly charges, and demographic attributes. The goal is to identify factors most strongly associated with higher churn rates to guide customer retention strategies.

## Key Insights & Findings:

### Contract Type and Churn:

Customers on month-to-month contracts exhibit the highest churn rate, with 42% of such customers likely to churn. In contrast, customers on one-year and two-year contracts have churn rates of 11% and 3%, respectively. Implication: Longer contract periods serve as a strong retention tool, as customers with extended commitments are far less likely to leave.

### Payment Methods and Churn:

Customers paying via electronic checks show the highest churn rate at 45%, while those using credit cards, bank transfers, or mailed checks have significantly lower churn rates, averaging around 15-18%. Implication: The convenience, security, and trust issues related to electronic payments might be contributing factors. Encouraging customers to switch to more stable payment methods could reduce churn.

### Churn by Tenure:

Customers with less than one year of tenure are the most likely to churn, with a 50% churn rate. Those with 1-3 years of tenure show a decreasing churn trend at 35%, while customers who have been with the company for more than three years have a churn rate of just 15%. Implication: Engaging customers early in their journey, especially within the first year, is critical for retention.

### Churn by Internet Service Type:

Customers using Fiber Optic services show a higher churn rate of 30%, compared to DSL customers with a churn rate of 20%. Implication: This could be due to increased competition or dissatisfaction with service quality. Understanding customer satisfaction with service speed and reliability may help retain fiber optic users.

### Churn Among Senior Citizens:

Senior citizens (aged 65+) have a churn rate of 41%, compared to a 26% churn rate among non-senior citizens. Implication: Special retention programs and targeted customer service for senior customers may help reduce churn in this demographic.

### Churn by Monthly Charges:

Customers with monthly charges between \$70-\$100 exhibit a relatively higher churn rate, with approximately 38% of customers in this group likely to churn. Implication: The pricing range suggests that customers in this segment may be more sensitive to pricing or value perceptions. Offering tailored plans or discounts could help retain these customers.

### Visualizations & Data Insights:

#### Bar Charts and Line Graphs:

The visual representation of churn by payment method clearly shows that customers using electronic checks churn almost three times as much as those using more traditional or secure methods like credit cards. Customer tenure vs. churn rate visualizations reveal a clear declining trend in churn as customers' tenure increases, underscoring the need for early-stage customer loyalty programs. Monthly charge distribution reveals a higher churn rate among customers with charges between \$70-\$100, indicating a potential opportunity for pricing adjustments.

#### Percentage Distribution of Churn Across Factors:

Payment Methods: 45% churn for electronic check users, 15% for credit card users.

Contract Types: 42% churn for month-to-month contracts, 11% for yearly contracts, 3% for two-year contracts.

Tenure: 50% churn in the first year, dropping to 15% after three years.

Monthly Charges: 38% churn for customers with charges between \$70-\$100.

### Recommendations:

- **Promote Long-Term Contracts:** Offer incentives for customers to commit to longer contracts to reduce churn.
- **Address Payment Method Concerns:** Implement campaigns encouraging customers to switch from electronic checks to more reliable payment methods.
- **Customer Engagement in Early Tenure:** Focus on improving the customer experience within the first year, as churn is highest in this period.
- **Special Senior Citizen Retention Programs:** Create personalized offers or assistance programs to retain the senior demographic.
- **Re-evaluate Pricing for Customers with Monthly Charges Between \$70-\$100:** This group shows a relatively high churn rate. Offering pricing flexibility, discounts, or value-added services could improve retention.
